Experience

Setoo Solutions Aundh, Pune
Associate Full Stack Developer *Feb 2024 – Present*

- Developed 5+ responsive SaaS enterprise web applications using React.js, Next.js, and TypeScript, optimizing front-end loading speeds by 25% for complex data visualization workflows.
- Architected scalable state management patterns via Redux Toolkit and Zustand for heavy datasets, improving UI responsiveness by 31% and keeping application response boundaries under 100 ms.
- Leveraged AI tooling, including OpenAI and Gemini APIs, to engineer context-aware features, multi-step voice/text schemas, and document search interfaces that reduced manual inputs by 30% across platforms.
- Translated complex layout wireframes into reusable interface elements and custom data grids, directly lowering enterprise platform consumer onboarding times by 36% for external business clients.
- Optimized asynchronous UI rendering loops and minimized bundle cross-browser compatibility compilation issues by 20%, enhancing overall core web vitals and interaction metrics for modern web applications.

Projects

AI-Powered AEC Project Management Platform | *React.js, TypeScript, Redux Toolkit, Tailwind CSS*

- Created the comprehensive front-end architecture of an enterprise AEC SaaS platform using custom design systems, modeling interactive management workflows for complex product lifecycles and real-time schedules.
- Designed scalable state patterns to support high-density data grid rendering while building timeline-centric features and automated AI document summary search dashboards to step up field-data access by 41%.

Voice & Text Architecture: Complex Form Builder | *Next.js, OpenAI, Gemini, Supabase, Zustand, TypeScript*

- Engineered an end-to-end multi-step web application utilizing interactive voice/text automation schemas, successfully increasing user flow completions and positive customer touchpoints by 30%.
- Optimized asynchronous state transitions and high-frequency UI updates under heavy data arrays, preserving performance thresholds and completely eliminating client-side rendering lag under peak usage.

Setoo AI Labs | *JavaScript, TypeScript, Next.js, React.js, Tailwind, Google Analytics*

- Devised interactive front-end layouts showcasing live calling pipelines, automated analytics dashboards, and responsive client feedback matrices designed to aggregate, parse, and process large-scale streaming datasets.
- Integrated Google Analytics and custom event tracking parameters to establish data-driven feedback channels, boosting active platform user engagement trends and conversion pipelines by 50%.

Job Discovery Platform | *TypeScript, Next.js, React.js, Context API, REST APIs*

- Delivered a high-performance discovery client servicing a base of 5K+ active consumers, driving a 15% increase in user search retention through real-time search grids and dynamic filters.
- Crafted custom React lifecycle hooks and context patterns to abstract complex data-fetching protocols, expanding overall codebase modularity and engineering sprint velocity by 30%.

Education

MIT World Peace University, Pune 2019 – 2023
Bachelor of Computer Science and Engineering *CGPA - 8.87*

Technical Skills

Front-End Development: React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, Responsive Design, Tailwind CSS, GSAP

State Management & Architecture: Redux Toolkit, Zustand, Context API

Backend, Databases & Cloud: SQL, Supabase, REST API Integration, GraphQL, DBMS, AWS (S3, ECS, CodeBuild)

AI Engineering & Tools: Git, Claude/OpenAI/Gemini API Integration, Sanity, Strapi, Modern Build Tools

Core Computer Science: Data Structures and Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems

Certifications

Full-Stack Web Development Bootcamp: Completed a Udemy course by Dr. Angela Yu, gaining hands-on experience in modern web technologies and full-stack development.
